### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference	FOR FURTHER ACTION	See item 4 below	
International application No. PCT/IL2004/000688	International filing date (day/month/year) 27 July 2004 (27.07.2004)	Priority date (day/month/year) 29 July 2003 (29.07.2003)	
International Patent Classification (8th See relevant information in Form P	edition unless older edition indicated) CT/ISA/237		
Applicant RAPHAELI, Dan			

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).		
2.	This REPORT consists of a tot	al of 4 sheets, including this cover sheet.	
		rence to the written opinion of the International Searching Authority should be read as a reference report on patentability (Chapter I) instead.	
3.	This report contains indications	s relating to the following items:	
	Box No. I	Basis of the report	
	Box No. Π	Priority	
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability	
	Box No. IV	Lack of unity of invention	
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement	
	Box No. VI	Certain documents cited	
	Box No. VII	Certain defects in the international application	
	Box No. VIII	Certain observations on the international application	
4.	The International Bureau will onot, except where the applicant date (Rule 44bis .2).	communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority	

Date of issuance of this report 30 January 2006 (30.01.2006)

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/IL04/00688

. Statement			
Novelty (N)	Claims	<u>2</u> -42	YES
	Claims	1	NO
Inventive step (IS)	Claims	NONE	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-42	YES
	Claims	NONE	NO

chain I facts novelry under PCT Article 33(2) as being anticipated by Creek (US 5771002) Creek discloses a locator method and system including a handheld master unit that identifies and interrogates a satellite unit RF tag with a command from a directional antenna. The satellite unit sends a response signal synchronized to the command. The master unit includes audible and visual indication satellite unit location. See abstract, col. 7 lines 30-41, col.

13 lines 50-67.

Claims 2 and 27-42 lack an inventive step under PCT Article 33(3) as being obvious over Creek (US 5771002) as discussed above in view of Anders (US 4656463). Anders discloses an analogous art RF tag locating method and system including a handheld interrogator with audible, visual and vibratory location indication. The antenna may be a phased array with azimuth and bearing movement. The location indication includes range (distance) measured by time interval (round trip delay) and azimuth/bearing measured by the phased array using known radar ranging. See fig. 29, col. 24 Line 52 - col. 25 line 2, col. 37 lines 6 - 37, col. 8 line 16 - col. 39 line 22. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included in Creek the phased array and azimuth indication of Anders in order to allow direction indication without the need of the user to manually turn in a circle to fine the direction of maximum signal. Round trip delay would have been obvious in view of

Claims 3-26 lack an inventive step under PCT Article 33(3) as being obvious over Creek (US 5771002) and Anders (US 4656463) as discussed above and further in view of Wang (US 5912644) or MacLellan (US 5940006) Wang and MacLellan disclose analogous art RF tag interrogation/location systems/methods including wideband (CDMA / spread spectrum) communication. See the abstracts. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included in the combination applied above the wideband communication of Wang or MacLellan for known advantages such as reduced interference.
